Some banks leave technology to the techie
Agile minds see the bigger picture
Passion to Perform

Group Technology & Operations: Technology
Spring into Banking Programme

Deutsche Bank is the ideal place for candidates to realize their full potential in the global banking industry. Balancing passion with precision, we compete to be the leading global provider of financial solutions, creating lasting value for clients, shareholders, people and the communities in which we operate.

We are highly respected within our industry. For the second time in three years, we’ve been named Best Global Investment Bank by Euromoney magazine (Awards for Excellence 2012). And with a presence in over 70 countries and substantial revenue streams from all the major regions of the world, Deutsche Bank is well positioned to meet the challenges of the increasingly globalized world economy.

Our programmes can help you explore and build a career in a variety of disciplines in the global finance industry. We are committed to investing in all our programmes to ensure we attract the best talent and future leaders. Whatever kind of career you’re interested in, whether it’s investment banking, trading, technology, human resources or risk management – we have a wide range of opportunities.

GTO Technology
The strength of technology and operations is present in everything we achieve. Delivering tailored information technology and seamless transaction solutions is essential to Deutsche Bank’s global resilience. Pioneering technologies and re-engineering processes, we combine exceptional levels of innovation with world-class client service. Our division designs and develops the systems, software and solutions that make millisecond transaction times cost-effective and reliable. Every second, we face the technological and logistical challenges implicit in growth, market change and constant competition.

Active in over 50 countries, Group Technology & Operations (GTO) employs around a quarter of our total staff. Technology is responsible for the development, implementation and maintenance of the cutting-edge hardware and software required to support our dynamic and successful franchise, ensuring the Bank can open for business each day. They create the core systems that process trades, assess risk and deliver data. Operations encompasses the people and processes that back up global deal-making. Every day, they make sure that billions of trades are settled, risk is minimised and clients are satisfied.

GTO is a known catalyst for change within our global Bank. We pride ourselves on our creativity, courage, adaptability and strategic vision. Maybe that’s why our unique processes have been recognised by a number of industry awards. Our primary task is to make the Bank efficient and responsive today, while building the foundation to meet the demands of tomorrow.

Our People
Our people are outstanding individuals with agile minds, from a diverse range of backgrounds and cultures. They generate fresh ideas and innovative solutions that set us apart from our competitors and add value to our clients.

Join our programme to find out more. To be eligible, you must be a first-year student (or second-year student in a four-year degree).

Your Programme
The Spring into Banking Program has been designed to give you exposure to all business areas within the Bank and on-the-job experience of your chosen division. Your placement will help you gain an understanding of investment banking and learn how Deutsche Bank provides leading financial solutions for the firm’s clients.

Your 1-week programme will offer numerous opportunities to learn and be exposed to some of the smartest people in the industry. You’ll experience a combination of classroom training, presentations by senior management, networking events and job shadowing. All will equip you with the knowledge and tools to help you decide whether a career in Investment Banking, and more specifically in your chosen division and Deutsche Bank, is right for you.

Spring into Banking will provide you with a true insight into life in an investment bank. You’ll find out how agile minds are nurtured and rewarded in the division you’re placed in and, also across Deutsche Bank as a whole. The skills you learn during the program will provide you with a solid platform for your career and could be the first step to you securing a place on our 2014 Analyst Internship Program.

Your Role:
You’ll have the chance to meet and work with members of our business teams, who will show you how they anticipate, identify and respond to our client needs. You’ll see how our business works from a range of perspectives: Project Management, Business Analysis, Functional Analysis, Business Management Support, Application Development, Technical Specialist, Production Management and External Service Provider Management.

Development:
Spring into Banking is an introduction into the world we work in, and the opportunities we can provide. You’ll see for yourself the resources and commitment we have for continued learning and development. And for those top performers who have the passion and agile minds that we look for, it’s also your chance to find out more about our Analyst Internship and full-time Analyst Training programme opportunities.
